750mm Drainage Installation High Street

Construction Works commenced in February 2020. As programmed, the initial phases of works included the installation of new storm water drainage pipes as part of the surface water drainage system with street lighting foundation installation running concurrently.

Works stopped due to the Coronavirus Global Pandemic on the 30th March and recommenced on the 2nd June. Currently 95% of the street lights column socket foundations have been installed.

The Storm water drainage upgrade works using pipes ranging from 750mm to 150mm diameter have been installed on High Street, Church Street, Townhall Street, Regal Pass, Darling Street and Middleton Street. Works also included reinstatement of the concrete sub base in the carriageway with 100m³ of ready mix concrete poured to date, cured prior to temporary resurfacing and reopening of the road to traffic.

upcomingworks

Currently Ongoing - End September

Road gully connections and installation on Darling Street, Church Street and High Street. Ready Mix Concrete sub base and temporary road surface installation on Church Street and High Street

End September

Darling Street: Squad 1 - Footpath excavation and paving works commence at Moonies Café heading towards the junction with Halls Lane
