**Local Development Plan
Population and Growth
October 2018**

1.0 Introduction

- 1.1 This background paper has been prepared to draw together the evidence base that has been used to inform the preparation of the Fermanagh and Omagh Local Development Plan (LDP) 2030. It is one of a suite of topic-based background papers that should be read alongside the LDP to understand the rationale and justification for the policies proposed within the draft Plan Strategy.
- 1.2 It is an update of the Position Paper prepared and published as the baseline evidence for the Preferred Options Paper (POP) in October 2016 and which identified the key issues that need to be addressed by the LDP.

The paper provides information on:-

- (i) a profile of the population including the different Section 75 groups of people;
- (ii) population growth and population projections up until 2030; and
- (iii) a settlement strategy for accommodating growth.

2.0 Population Profile

- 2.1 Population change has implications for the provision of housing, employment opportunities and public services including health, education and infrastructure. It is therefore important to know the components of population change and the characteristics of the population when planning for future growth. Planning is also about meeting the needs of everyone.
- 2.2 Section 75 of the Northern Ireland Act 1998 requires a public authority, in carrying out its functions relating to Northern Ireland, to have due regard to the need to promote equality of opportunity:
- between persons of different religious belief, political opinion, racial group, age, marital status or sexual orientation;
 - between men and women generally;
 - between persons with a disability and persons without; and
 - between persons with dependants and persons without.

In addition, without prejudice to the above obligations, public authorities are required to have regard to the desirability of promoting good relations between persons of different religious belief, political opinion or race.

2.3 The principle of promoting equality of opportunity and good relations between people must be a key objective behind the plan and will be a central theme of the sustainability assessment. In land use planning terms this means ensuring everyone benefits from quality housing, employment, and access to public services and recreation facilities. These themes will be addressed in more detail in later papers. However, this paper begins the process of identifying issues and needs facing different groups within our area over and above the general population, so that these can be considered at every stage of the plan making process. If an aim of the plan is also to help build a cohesive society then it must also be recognised that this can only be achieved by “sharing space” and “accessing opportunities”. Therefore, the paper also examines the extent to which segregation occurs and the pattern of multiple deprivation.

(a) Age Structure

2.4 Fermanagh and Omagh is broadly in line with the Northern Ireland population age structure albeit with a slightly higher proportion of those under 16 years of age (Tables 1 and 2). In relation to age it is young and old people who tend to be most vulnerable. There tends to be more elderly people in the towns where there is a range of facilities including nursing homes, sheltered and other housing designed to meet their needs, together with better access to services. However, there are also many elderly people living in the countryside where access to services is more problematic, particularly in Fermanagh. There is a slightly younger age profile in the rural areas around Omagh town as well as within newer housing developments such as those in Killyclogher (see Maps 1 & 2, Appendix 1).

Table 1 – Age Structure of Population 2001

	0-15 years	16-64 years	65+ years
N Ireland	23.6% (398,056)	60.9% (1,025,700)	15.5% (261,511)
Fermanagh District	24.1% (13,864)	60.0% (34,514)	15.9% (9,149)
Omagh District	25.9% (12,399)	60.6% (29,055)	13.6% (6,498)
Fermanagh & Omagh	25%	60.3%	14.75%

Mid 2017			
N Ireland	20.88% (0.07) (390,684)	62.92% (1.57) (1,177,175)	16.2% (1.64) (302,975)
Fermanagh District	21.35% (0.09) (13,593)	61.3% (2.51) (39,034)	17.35% (2.43) (11,047)
Omagh District	21.94% (0.78) (11,545)	62.75% (1.45) (33,015)	15.3% (2.22) (8,055)
Fermanagh & Omagh	21.61% (0.31)	61.96% (2.04)	16.43% (2.35)
<i>Source: NISRA 2018 (coloured figures in brackets indicate % increase or decrease in population from 2011 Census statistics)</i>			

2.5 The Northern Ireland trend is that the proportion of people over 65 years of age is growing and is expected to overtake that of children (those aged under 15 years) by mid-2038 (20.4% and 19.8% respectively) (NISRA 2014-based population projections). The district is projected to experience the highest growth in the population aged 65 and over with a growth rate of 33.2% between mid-2014 and mid-2024. By 2030, the proportion of people over 65 will be 22.5%. A key issue for elderly people is poverty with many older people having to live on reduced incomes, with reduced mobility and increased disability. Nearly one half of people over 60 in Northern Ireland live with a long-term illness or disability and this grows with age (Census 2011). (HSNI figures for 2016/17 indicate 62% of people aged 65-74 had a longstanding illness with that figure rising to 75% of over 75s).

2.6 Some 15% of Northern Ireland's pensioners live in low income households (defined as below 60% of medium income after deducting housing costs), 1% below the UK average (Family Resources Survey, 2016/17). This is reflected in car ownership with one fifth of retired couples and two thirds of single pensioners living in households without a car. It is also reflected in fuel poverty. In 2006, a third of all households were in fuel poverty with single pensioners being the group

at greatest risk (Northern Ireland Housing Survey, 2008). This figure had risen to 44% of households in 2009 (DSDNI 'A New Fuel Poverty Strategy for Northern Ireland' March 2011). In 2016 falling oil prices and increasing energy efficiency measures meant fuel poverty fell sharply to 22% in 2016. This figure is likely to rise again however as while 500 litres of home heating oil cost £125 in January 2016¹ the same volume would cost on average £273 in September 2018. Fermanagh is one of the areas in Northern Ireland with the greatest proportion of houses without central heating.

- 2.7 The growing number of elderly is a key factor in declining average household size, projected to drop for Fermanagh and Omagh from 2.69 in 2012 to 2.59 in 2025 (NISRA Household Projections, 2012). This has been taken into account by central government when formulating the Regional Development Strategy 2035 Housing Growth Indicators. A Local Development Plan has a role in providing development land to meet these indicators and facilitate housing units to meet the needs of the elderly, particularly nursing homes, sheltered accommodation and smaller sized units. It also has a role in ensuring such units are accessible. Building control ensures design compliance, however planning needs to ensure that housing for the elderly is sited where it is accessible to local services and transportation. These services include health and other community facilities together with recreation and shops. A rising elderly population will also increase demand for health and community services, the development of which will also need to be accommodated.
- 2.8 Around 22% of the population in Fermanagh & Omagh is under 16. The number of children under 16 in Fermanagh and Omagh is projected to fall by 991 between 2015 and 2030 to 23,931 (NISRA, Population Projections 2014). This will have implications for provision of crèches, nurseries and schools. Perhaps the largest change will be in the provision of secondary education with the development of the Strule Education Campus at Lisanelly, Omagh and the amalgamation of Portora and the Collegiate in Enniskillen.
- 2.9 Children are also a vulnerable group. Over one quarter (26%) of children in Northern Ireland are living in low income households (FRS, 2007). Young people do not have independent use of a car. Therefore, safe and sustainable access to community and recreation facilities, including play parks and sports grounds, remains high on the agenda.
- 2.10 All of the above issues are also relevant to people between 16 and 65, the key difference being employment is a major issue for those people of working age. In June 2018, the claimant count for the Fermanagh & Omagh District was 1,485 a rate of 2.1% which is lower than the NI rate of 2.4% (NISRA - Claimant Count tables, June 2018). Unemployment is a particular issue for young people, with all new

¹ Data provided by The Consumer Council.

claimants joining from 2008 to 2014, aged 24 and under, accounting for 40%. Unemployment is looked at in more detail later.

(b) Marital Status

2.11 Since 1991 there has been an increase in the proportion of single people in N. Ireland. In the Fermanagh and Omagh, the trend is similar, albeit with a slightly higher proportion of married people (Table 3).

Table 3 - Marital Status in 2011

	All People ≥ 16	Single (never married) %	Married * %	Divorced %	Widowed** %
NI	1,431,540	36.14	51.63	5.45	6.78
Fermanagh/Omagh	88,353	35.76	53.41	4.0	6.77
Fermanagh	48,664	35.46	53.27	4.11	7.16
Omagh	39689	36.14	53.59	3.96	6.31

Source:- Census 2011

*2011 Married – This includes people who were remarried; those who are separated but still legally married; and those in a same-sex civil partnership. ** 2011 Widowed includes surviving partner from a same-sex civil partnership.

2.12 Official statistics mask the number of couples (unmarried) who are co-habiting. The role of planning is not to pass moral judgements but to meet the needs of the population. In this case, the challenge is providing housing to meet the needs of single people. It is reasonable to assume that many single wage earners will not have the same purchase power of a double income household. Single people also have different social needs to those who are married/co-habiting and have families. Young, single people are key to the economy of any town centres, providing a significant part of the market for pubs, clubs and restaurants. However, this can mask the feeling of social exclusion experienced by many single people, particularly the elderly, disabled and single parents. Single parents remain one of the most disadvantaged groups with over half falling within low-income groups and over half of lone parent families not having access to a car (Poverty site, 2010).

(c) Gender and Life Expectancy

2.13 The usually resident population is broadly split on a 50/50 basis between men and women. Life expectancy continues to improve for both males and females. Over the period 1998-2000 to 2008-2010, life expectancy for males improved at a slightly faster rate than for females, reducing the gender gap to females who live around 5 years longer than males, a differential which is slightly higher than the N Ireland level. In the UK, life expectancy at birth is expected to increase by around five years between 2012 and 2037 (Office of National

Statistics, 2013) for both men and women and it is therefore anticipated that life expectancy will similarly increase in the Council area.

Table 4: Gender balance of Fermanagh and Omagh Population

Sex	Fermanagh - Omagh	Fermanagh	Omagh	N. Ireland
Male	50.05%	50.12%	49.99%	49%
Female	49.94%	49.88%	50.01%	51%

	1998-2000		2011-2013	
	Males	Females	Males	Females
NI	74.49	79.57	78.1	82.4
Fermanagh	74.3	80.3		
Omagh	73.8	80.3		
Fermanagh & Omagh			78.6	83.3

Source: NISRA

- 2.14 There are key differences between the sexes in that women tend to take on the role of carer whether it be for children or aging relatives which is discussed later. Women suffer inequalities in terms of wealth, employment and access to services. The gender pay gap (i.e. the difference between men's and women's earnings as a percentage of men's earnings) in 2017 based on median gross hourly earnings (excluding overtime) for full-time employees is 8.7% (NI Annual Survey of Hours and Earnings (ASHE)). In Northern Ireland the difference is most pronounced for those on low incomes, with half of those people earning less than £7 being in part time employment, mainly women (DETI, 2010). The gender gap is also reflected in access to a private car with 25% of men in the UK and 40% of women lacking a car in their household or not possessing a driving license (Poverty site, 2010). These figures are often masked by the fact that only a small percentage of couples do not have access to a car.
- 2.15 Planning can have a role in addressing this inequality not only by facilitating job creation but by facilitating new employment opportunities at locations accessible by sustainable forms of transport other than just the private car. The same holds true for shops, recreation, and community services. Planning can also help by adopting a more flexible approach to innovation and a flexible approach to home working.

(d) Health and Disability

- 2.16 A person is described as having a limiting long-term health problem if they have a health problem or disability which limits their daily activities

and which has lasted, or expected to last, at least 12 months. This includes problems that are due to old age (Census 2011). In 2014/15, 5% of children in Northern Ireland were disabled compared to 18% of adults of working age and 47% of adults over State Pension age (DSD Family Resources Survey). Overall, the health of the area is improving (Tables 6 & 7) but one in five people in Fermanagh-Omagh suffer from some form of limiting illness.

- 2.17 Areas within towns tend to have more elderly people and people with a long term illness e.g. Lisanelly 1 and Strule in Omagh and Devenish in Enniskillen. In general, where there are higher levels of long term limiting illness, there are lower levels of people who described their health as being good or very good and vice versa. There are also areas with slightly higher proportions of people providing unpaid care including Lisnarrick, Ballinamallard, Florence Court & Kinawley and Rosslea, Beragh, Fairy Water, Killyclogher 1 and Termon (see Maps 3, 4 & 5, Appendix 1).

Table 6 – Health in 2001

	Limiting long-term illness	Good General Health	People Providing Unpaid care
NI	20.4%	70.0%	11.0%
Fermanagh	19.2%	72.2%	9.9%
Omagh	20.4%	71.4%	10.0%

Source: - Census 2001

Table 7 – Health in 2011

	Limiting long-term illness	Good or Very Good General Health	People Providing Unpaid care
NI	20.69%	79.51%	11.81%
Fermanagh	19.91%	81.02%	10.92%
Omagh	21.76%	78.62%	11.14%

Source: - Census 2011

- 2.18 If care in the community is to succeed, value needs to be attached to carers. In 2013/2014, 6% of the population were informal carers and that figure included 8% of working age adults, 8% of State Pension age adults and 2% of children. Some 59% of reported carers are women. The time spent caring varies from 46% of adult carers providing care for less than 20 hours per week, to 19% caring for 50 hours or more per week (DSD Family Resources Survey, 2013-14).

- 2.19 The link between health and wealth is well rehearsed as is the relationship between mobility and health. Therefore, as with other

groups, planning has a role in accommodating accessible housing, employment and services. Planning also has a role in helping to improve the health and well-being of people by avoiding development which would result in a deterioration in air or water quality; safeguarding and facilitating open space, sport and outdoor recreation; managing the adverse impacts of noise and nuisance by influencing the location, layout and design of new development. Planning also has a role in recognising and facilitating development to meet the needs of carers, by facilitating houses for those with special circumstances or extension of homes to include “granny annexes”.

(e) Households with or without dependent children

2.20 A “dependent child” is defined as 0-15 or aged 16-18 who is a full-time student and living in a family with his or her parent(s) or grandparent(s) (Census 2011). The proportion of households (including lone parent households) with dependent children has declined since 1981, although Fermanagh-Omagh remain slightly higher than the NI average (Table 8). In general, there are more areas in Omagh District with higher proportions of dependent children, particularly in predominantly Catholic areas in Omagh town and some rural areas (see Map 6, Appendix 1).

Table 8 – Households with Dependent Children – Census 2011

Households	Both districts	Fermanagh	Omagh	N. Ireland
% with dependent children 2011	35.12%	33.61%	36.64%	33.85%
% with dependent children 1981	48.29%	46.25%	51.01%	45.98%

Source: Census 1981, 2011

2.21 The decline in households with dependent children is another reason why the average household size has declined. However, a significant proportion of households in Fermanagh and Omagh are larger in size, well above the Northern Ireland average. In part this could be due to the inclusion of other dependents such as the elderly or infirm (Table 9).

Table 9 – Household Composition

	All Households	1 Person Household (%)	2 Person Household (%)	3-4 Person Household (%)	5 + Person Household (%)
NI	703,275	27.93	30.19	31.44	10.46
Fermanagh/Omagh	41,512	27.1	27.43	31.35	14.11
Fermanagh	23,069	27.55	28.39	31.14	12.91
Omagh	18,443	26.52	26.25	31.61	15.62

Source: Census 2011

2.22 The role of planning in relation to access and service provision has been rehearsed with regards to the elderly and children. It is worth emphasising that those acting as carers regularly face the same issues particularly in households where the carer is on a low income and does not have access to a car. The Local Development Plan has a role in providing a range of houses types to meet the needs of different household sizes and to provide policy to facilitate those wishing to expand their houses to meet changing needs, providing it does not harm other interests of acknowledged importance.

(f) Sexual Orientation

2.23 There are no specific figures available on how many people may be Gay, Lesbian, Bi-sexual or Trans-gender or Trans-sexual in Fermanagh-Omagh. People in this group often feel excluded or marginalised in society. More importantly, they can also fall victim of discrimination and threat of physical violence from the less tolerant in society. Whilst the Plan is unlikely to bring forward specific proposals and policies for them, it is anticipated that many of the measures in a Local Development Plan aimed at providing a range of house types, creating employment and accessible services as well as improving safety and security will benefit this group.

(g) Race and Ethnicity

2.24 In 2001, 9% of Northern Ireland’s population were born outside the region and this was a similar statistic in both Fermanagh and Omagh Districts. By 2011, this proportion had increased to 11.1% for N. Ireland compared to 13.36% of the Fermanagh-Omagh population. The majority of non-indigenous people were born either in the rest of the UK or in the Republic of Ireland. The remainder comprises people born in other European countries and countries outside Europe (Table 10).

2.25 Racial ethnicity remains predominantly ‘white’ with 99% of the district described in this category. Other ethnic groups including Asian, Black and Mixed comprise very small numbers (Census 2011) and as a consequence it is unlikely that the Local Development Plan will have a particular impact on these groups. However, it is important to monitor changes over time as this may have implications particularly in relation to equality of access to homes and jobs.

Table 10: Country of Birth for Fermanagh – Omagh 2011

	N Ireland	Rest of UK	Republic of Ireland	Europe	Outside Europe
Both Districts	86.64%	4.64%	4.69%	2.8%	1.16%
Fermanagh	84%	5.47%	6.66%	2.71%	1.13%

Omagh	89.83%	3.64%	2.32%	2.92%	1.2%
N Ireland	88.84%	4.47%	2.09%	2.6%	1.84%

Source: Census 2011 Note: Channel Islands and Isle of Man are excluded from the above figures.

2.26 An exception may be Irish Travellers who have been described as a different ethnic group. Their needs can be distinctive in terms of providing sites or supported housing for travellers. The housing needs assessment undertaken by the NIHE addresses this matter and will be considered in a later housing paper.

(h) Religion and Political Opinion

2.27 The designation of settlements and provision of development opportunities needs to be carefully considered against the needs and spatial distribution of people of different religion or political opinion to prevent prejudice of any religious or political group and thus meet the requirements of Section 75 of the Northern Ireland Act.

2.28 The Fermanagh-Omagh population has a predominantly Roman Catholic background in contrast to the region as a whole (Table 11). The majority of Super Output Areas (SOAs) are reasonably mixed though quite a few can be identified as being either predominantly (more than 70%) Protestant/Other or Roman Catholic. On the whole there are more 'balanced' communities in Fermanagh than in Omagh (see Map 7, Appendix 1). However care needs to be taken when examining mix across the wide area as this can conceal the stark differences between neighbourhoods in towns and villages.

Table 11: Religious composition of Fermanagh-Omagh 2011

Religious background	Fermanagh-Omagh	Fermanagh	Omagh	N. Ireland
Roman Catholic	64.23%	59.16%	70.34%	45.14%
Protestant/Other Christian	33.07%	37.78%	27.42%	48.36%

Source: Census 2011

2.29 In Northern Ireland, political opinion is viewed as being closely associated with religious belief in that Catholics will generally vote for Nationalist parties while Protestants vote for Unionist parties. However, the results of the first preference votes cast in the 2014 Local Elections suggest that some Catholics vote for Unionist parties as well as for other parties and independents (Table 12). Of course the converse could also be true for some Protestants.

2.30 Care needs to be taken when making comparisons between communities of different religious/political persuasion as this can be extremely divisive and can unravel the definite progress made in bringing the two communities together. However, there are certain facts which need to be addressed. The proportion of Catholics in low

income groups in Northern Ireland is much higher than their Protestant counter parts, 26% compared with 16% (Family Resources Survey 2008/9).

Table 12: Political Opinion across Fermanagh-Omagh 2014

Political Party Groupings	Proportion of First Preference Votes
Nationalist parties	60%
Unionist parties	37%
Independent/Other	3%

Source: 2014 Local Government Election Results

(i) Spatial Deprivation

- 2.31 An effective way to promote good community relations and equal opportunity is to tackle social deprivation and inequalities in the labour market and public health. The Northern Ireland Multiple Deprivation Measure (NIMDM) 2017 replaced NIMDM 2010 as the official measure of deprivation in Northern Ireland. NIMDM 2017 identifies small area concentrations of multiple deprivation across Northern Ireland (Super Output Areas with an average population of 2100). Within the context of the average rankings for the 11 LGDs in Northern Ireland where ranks range from 1 (most deprived) to 11 (least deprived), Fermanagh and Omagh is ranked 9th, however within each area there remain pockets of high deprivation. The MDM shows that 24% of the total Fermanagh and Omagh population live in the top 25% most deprived Super Output Areas (SOAs) in Northern Ireland. The Council area also contains three SOAs which are amongst the top 10% most deprived in Northern Ireland – Devenish (Rank 44), Lisanelly 2 (Rank 46) and Lisanelly 1 (Rank 47) – out of a total of 890 SOAs in Northern Ireland (890 being least deprived).
- 2.32 The advantage of this spatially led approach is that it identifies disparities between urban and rural areas and adjoining neighbourhoods, for example, Lisanelly 2 in Omagh (Rank 46) and the adjoining SOA Gortin (Rank 573) (less deprived) in Omagh. Generally speaking, the more peripheral areas of Fermanagh-Omagh tend to be more disadvantaged compared to the immediate hinterland of the towns and the productive river valleys. There are significant pockets of deprivation (income, health, education, skills) in the two hubs and in Newtownbutler, Rosslea and Fintona.
- 2.33 The highest concentrations of deprivation with respect to proximity to services (i.e. long distances to key services e.g. A & E hospital, GP premises, supermarket, leisure centre) include Belcoo and Garrison, Rosslea and Trillick. The most deprived SOAs for crime and disorder are Portora, Devenish and Erne in Enniskillen and Lisanelly 2 and Drumragh in Omagh town.

2.34 Deprivation is also reflected in economic activity. Whilst unemployment has fallen from 7.0% (Fermanagh) and 8.5% (Omagh) in 2001 to just below 5% in 2011, despite the down turn in 2007 (Table 13) there are localised areas of higher unemployment in Lisanelly (8.4%), Owenkillew (8.31%) and Devenish (8.51%). In providing employment, manufacturing and construction provide proportionally more employment in the new council area compared to N.I average and service jobs are comparatively lower (Table 14). Thus, the role of the future Local Development Plan in addressing deprivation is through the provision of a generous supply of industry and business land.

Table 13 - Economic Activity of the Population (16-74 year olds) in 2011

	Economically Active			Economically Inactive
	Total	Unemployed	Long-Term Unemployed	Total
NI	66.22%	4.96%	44.98%	33.78%
Fermanagh	67.14%	4.71%	47.35%	32.86%
Omagh	64.52%	4.92%	46.79%	35.48%

	Total No of Jobs	% Jobs in Manufacturing	% Jobs in Construction	% Jobs in Services
Fermanagh	20,754	14.9%	5.1%	78.3%
Omagh	17,513	8.3%	8.6%	80.9%
Combined	38,267	11.9%	6.7%	79.5%
NI	681,641	10.9%	4.8%	83.1%

Source: DETI District Council Briefings November 2013. Employee jobs by Industry, September 2011 (Northern Ireland Census of Employment 2011)

2.35 Education has also an important role in promoting economic well-being. Better education improves access to employment opportunities. It improves the quality of people's lives and leads to broad social benefits to individuals and society. Education raises people's productivity and creativity and promotes entrepreneurship and technological advances. In addition, it plays a very crucial role in securing economic and social progress and improving income distribution. Since 2001, the proportion of people aged 16 years old and over who had a degree or higher qualification has increased and the proportion that had no or low (1-4 O Levels/CSE/GCSE or equivalent) qualification has decreased (Table 15). However education achievement in parts of the main towns and rural areas remains low, particularly in Gortrush, Devenish, Drumquin, Fintona, Newtownbutler and Lisnaskea (see Map 9, Appendix 1)

Table 15: Qualifications of Population over 16 years of age in Fermanagh-Omagh

	Fermanagh	Omagh	Northern Ireland
No or low qualifications	44.09% (44.79%)	42.17% (43.34%)	40.63% (41.64%)

- 2.36 Whilst a Local Development Plan does not deliver educational services, it can assist in making such services more accessible either by facilitating new state-of-the-art facilities or providing travel options.

(j) The East West and Urban-Rural Divide

- 2.37 The Family Resources Survey Urban Rural Report (DfC, 2013-14) reveals that the average weekly income in Northern Ireland in 2013/14 was £395 before housing costs however, this figure is skewed upwards by the Belfast Metropolitan area where the average is £428. Nearly 19% of people in NI are in relative poverty and this percentage is highest in the rural west at 24%. About 60% of N.I. household income comes from wages or salaries with another 8% from self-employment. However, in the rural west, 13% of income is derived from self-employment, with nearly 22% of males self-employed compared to a 8% N.I. average. Male unemployment is also higher at 7%. Households in the urban west are more dependent on income subsidy with 43% receiving a benefit compared to 16% in the rural east. In 2012/13, the urban east received a marginally higher level of non-income related benefit at 77% compared to 76% in the rural west. The rural west has the highest level of house ownership with 48% of homes owned outright (DfC, FRS Urban Rural Report 2013-2014).
- 2.38 What this means for a Local Development Plan is that not only is there a need for quality employment to lower the need for benefits, but there is also a culture of independence and entrepreneurship and, if facilitated, many households will generate their own income and provide their own homes.
- 2.39 In 2011, Fermanagh and Omagh District was relatively rural with just over half of the population living in designated settlements while the remainder lived in the open countryside (Table 16). The number of households increased significantly in the countryside between 2001 and 2011, increasing by 25% compared to a 6.74% increase across the settlements. The proportion of households in the countryside was 40.8% (16,931) in 2011 compared to 59.2% (24,581) in the settlements.

Countryside		52,198 (46.1%)
Total District	113,161	

Source: - Census 2011

- 2.40 From this analysis it is clear that the towns need to develop in order to fulfil their roles as regional hubs and, in the case of Enniskillen, a regional gateway. This said, the needs of those people living in the rural area cannot be forgotten and if those populations are to be sustained they will also require their share of housing and employment opportunities. These themes will be picked up in later papers.

Conclusions

- 2.41 From the analysis a local development plan can assist building inclusive and cohesive communities addressing everyone's needs by providing equality of opportunity, facilitating employment and wealth creation, providing accessible services, increasing transportation options and promoting shared space. Decisions must be made based on targeting deprivation and being aware of the consequences for Catholic and Protestant communities. The policy areas where a Local Development Plan is likely to have an impact on Section 75 groups will be subject to an Equality Impact Screening exercise.
- 2.42 A Local Development Plan, designed to complement a community plan, can assist in combating many of the issues highlighted by formulating policy and proposals for the area designed at truly achieving sustainable development. Under the three key headings of sustainable development, (i.e. economic, social and environment) it is clear that if the needs of the community and Section 75 groups are to be addressed, then we need to increase the economic and social base, whilst also protecting and enhancing the environment and improving public infrastructure. Accordingly, a number of objectives have been drafted for the future Local Development Plan which have taken account of the community plan and its spatial aspirations. These objectives (Table 17) have evolved from those set out in the original Position Paper 1 and have taken into account consultation responses to the Preferred Options Paper.

Table 17 – Strategic Objectives

Plan Strategy Objectives		Link to Community Plan
Social		People and Communities
1	Develop the roles of Enniskillen and Omagh as economic, transportation and cultural hubs providing the main focus for new housing, employment, shops, leisure activities, public administrative and community services including health and education.	<p>Aim: To improve the wellbeing of our citizens and develop thriving rural and urban communities</p> <ol style="list-style-type: none"> 1. Our people are healthy and well – physically, mentally and emotionally 2. Older people lead more independent, engaged and socially connected lives 3. Our communities are inclusive, safe, resilient and empowered 4. Our people have the best start in life with lifelong opportunities to fulfil their potential
2	Protect and sustain the role of local towns and villages so that they act as local centres for shops and community services meeting the daily needs of their rural hinterlands.	
3	Provide for vibrant rural communities whilst protecting the countryside in which they live by accommodating sustainable development.	
4	Provide for 5,190 ² new homes by 2030 across a range of housing types and tenures capable of meeting the needs of all sections of the community at locations accessible to existing and new community (including education) services, employment, leisure and recreational facilities.	
5	Facilitate the development of new social, community and recreational services at locations accessible to existing communities and new housing developments, through a variety of modes of transportation e.g. public, active ³ and community.	
6	Provide for environments that are safe, healthy and connected and which enhance opportunities for shared space for all.	
Economic		Economy, Infrastructure and Skills
7	Promote sustainable economic development and growth by facilitating the creation of 4,875 new jobs by 2030 and providing a	<p>Aim: To improve employment opportunities for all by supporting the development and growth of a more sustainable local economy and better</p>

¹ The Revised Housing Growth Indicator for FODC for the period 2012-2025 is 4,500. This translates to 6,230 dwellings up to 2030 and 5,190 dwellings for the period 2015-2030.

² Active travel is defined as personal travel involving some element of physical activity, mainly walking and cycling.

	sufficient supply of economic development land through a range and choice of sites, taking into account accessibility by public transport and active travel modes.	connected area. 5. Our economy is thriving, expanding and outward looking 6. Our district is a connected place
8	Promote inward investment, diversify the local economy, assist with economic regeneration and physical renewal, and help generate skilled, well paid employment opportunities and improve employability in the most deprived areas.	
9	Recognise and accommodate the micro business base including rural entrepreneurship, self-employment and home working	
10	Support the provision of an accessible, integrated, safe and sustainable transport network and locate development to improve accessibility by public transport, cycling and walking, help reduce car dependency and the impact of traffic on local communities and the environment.	
11	Improve digital connectivity which both meets the needs of business and private households whilst reducing the need to travel.	
12	Develop the Council area as a destination for quality leisure visits and sustainable tourism by enabling the provision of new, as well as enhancement of existing tourism infrastructure in appropriate locations.	
Environmental		
13	Conserve, sustain and enhance the area's environmental qualities, local distinctiveness including special landscapes, and sites of environmental importance in terms of biodiversity, wildlife and habitats, local landscape character, townscape, traditional settlement patterns, and historic environment.	Aim: To promote positive action on climate change, sustainable management and enhancement of the natural, built and cultural environment.
14	Follow the principles of sustainability and high quality design standards in all developments to assist with	

	meeting Climate Change targets and place-making.	
15	Sustainably manage and safeguard where appropriate our natural resources including minerals and water, protecting the environment and providing sustainable services including effective and sustainable waste management to meet population needs.	<p>7. Our outstanding natural environment and built and cultural heritage is sustainably managed and, where possible, enhanced.</p> <p>8. Our district is an attractive and accessible place.</p>
16	Support renewables infrastructure whilst affording protection to the environment including impacts on landscapes from wind energy developments.	
17	Prevent inappropriate new development in areas known to be at risk of flooding or that may increase the flood risk elsewhere and put in place measures to assist in flood risk management.	
18	Protect and enhance the local green infrastructure network such as open space and green wildlife corridors whilst contributing to the enhancement of community health and well-being.	

2.42 Planning can assist in achieving many of these goals by:

- (a) designating settlement limits and town centre boundaries;
- (b) zoning land for housing and industry and business;
- (c) reserving land for community, recreational use or infrastructure;
- (d) identifying and designating areas subject to environmental protection.

3.0 Population Growth and Population Projections

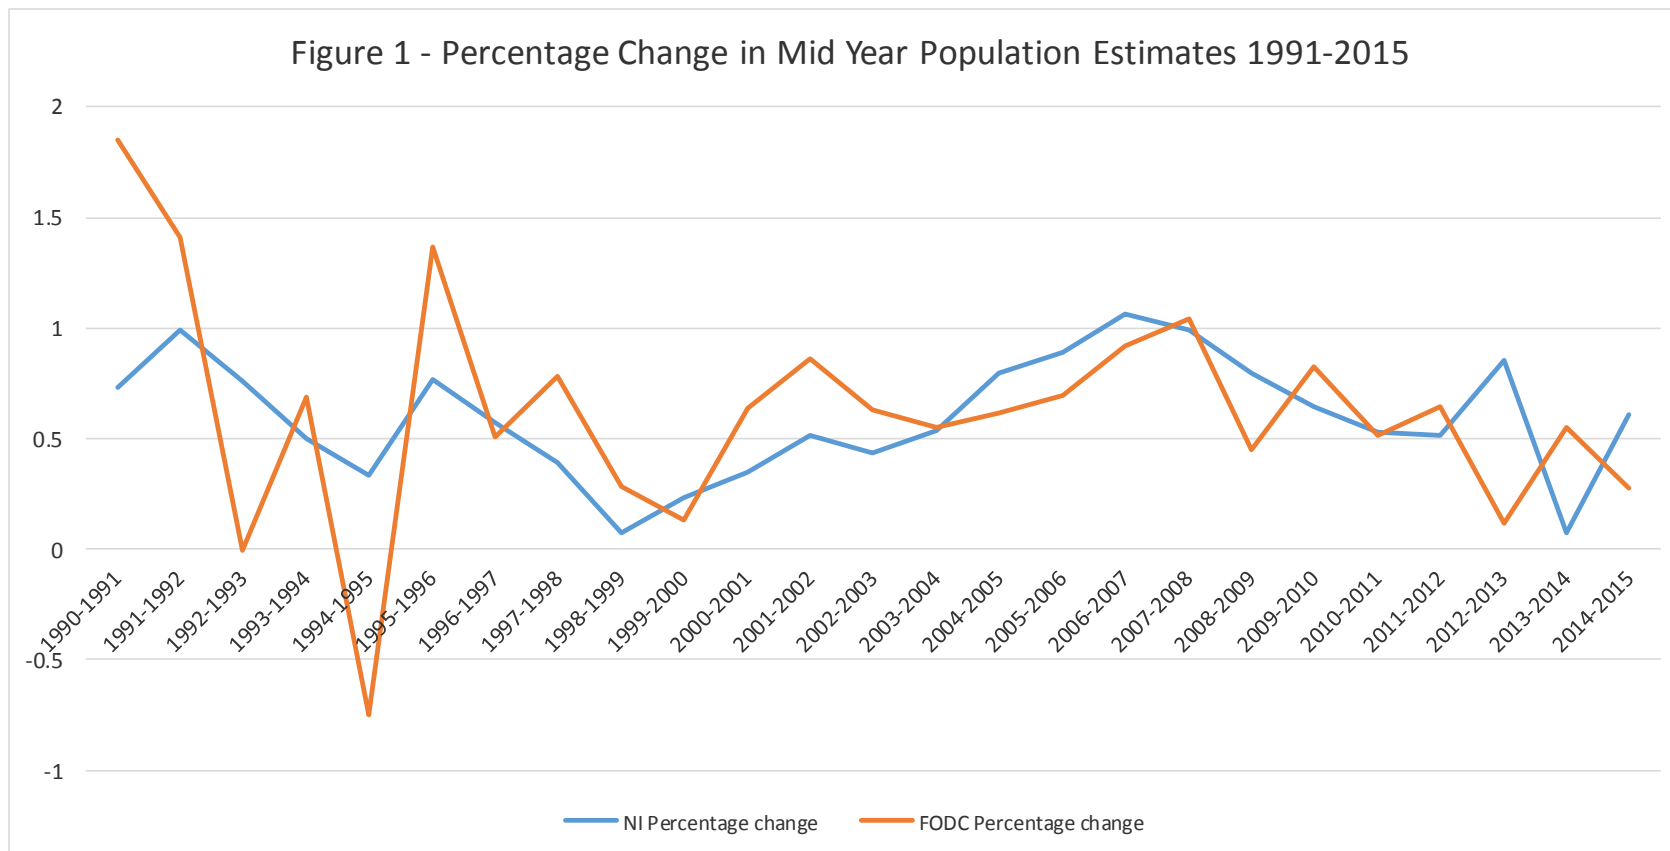

Population Growth and Components of Change

- 3.1 In 2011, the populations of the former Fermanagh and Omagh Districts were 61,805 and 51,356 respectively (113,161 in total). These represented a 7.3% growth in the population over a 10-year period closely mirroring the Northern Ireland average. Only Omagh District achieved a higher rate of growth during the period 1971-1981. In the 40-year period (1971-2011), both districts experienced population growth at a higher rate than the regional average (Table 18).
- 3.2 The Mid-Year Population Estimates indicate that Fermanagh and Omagh District's population has increased in population since 1996 with rates at times either above or below the NI average. In 2015 and 2016/2017, the District showed a percentage change in Mid-Year Population Estimates slightly below the regional figure. There have been marked fluctuations in the percentage change year to year since 1991 but more recent years have seen a steadying of this trend. The district has been following more closely the NI trend of smaller year on year positive growth (Figure 1).

Table 18 Population Trends in Fermanagh & Omagh 1971-2011

Year	Fermanagh District	Omagh District	Both Districts	NI
1971	50,979	41,180	92,159	1,536,070
1981	51,594	44,290	95,884	1,532,200
1991	54,033	45,810	99,843	1,577,840
2001	57,527	47,950	105,477	1,685,270
2011	61,805	51,356	113,161	1,810,863
% change 1971-1981	+1.2%	+7.6%	+4%	-0.25%
% change 1981-1991	+4.7%	+3.4%	+4.1%	+3%
% change 1991-2001	+6.5%	+4.7%	+5.6%	+6.8%
% change 2001-2011	+7.4%	+7.1%	+7.3%	+7.4%
% change 1971-2011	+21.2%	+24.7%	+22.7%	+17.9%

Source: - Census 1971, 1981, 1991, 2001 & 2011

Source: - NISRA 2016 (Figures for FODC based on an average of the percentages for the former Fermanagh and Omagh Districts)

- 3.3 Population change occurs due to the combined effect of net migration (both in and out migration) and the level of natural increase which is the difference between the number of births and deaths. Migration has had a significant impact on the population of NI and to a lesser extent the population of Fermanagh and Omagh District. After a long period through the 1970s and 1980s of emigration from Northern Ireland exceeding immigration and a period of balanced migration flows during the 1990s, the recent period since 2004 has seen significant population growth due to migration from the expanded EU. Thus, in 2011, some 2.76% of the new Council area's population were from EU countries particularly the eight central and eastern European (A8) countries (Poland, Lithuania, Slovakia, Latvia, Slovenia, Czech Republic, Estonia and Hungary). However, recent evidence suggests that since the economic downturn, the number of migrants has been declining and that natural growth is the main influence on population change (NISRA).

Population Projections

- 3.4 Every two years NISRA publishes population projections at local government level, the latest being the 2016-based projections (mid-2016 to mid-2041). These take into account migration, natural increase and other factors. In the 2016-based projections, natural growth is the key driver with the projected number of births exceeding the projected number of deaths in NI. It is therefore predicted that the total population in Northern Ireland will increase by 3.85% from 1.87M in mid-2016 to 1.945M in mid-2026 with the 2 million milestone being reached by mid-2039. Interestingly, this milestone date has been estimated at 5 years later than the previous 2014 estimates of 2034, given the slowing rates of population growth. Population projections become increasingly uncertain over longer time periods and therefore projections beyond a 10-year period should be used with caution.
- 3.5 The key findings for 2016-2041 are that the population of Fermanagh-Omagh is expected to grow by around 7.1%, down from the previous estimate of 8.4%. From 2016 to 2026, the number of children is expected to decrease by 3% whilst the number of working age people is expected to decrease by 1.9% compared to a 29.9% increase in the number of pensioners. The Council area is also projected to continue to have the smallest proportion of the total NI population (6.2% in mid-2016 and 6.1% in mid-2026)
- 3.6 The proportion of children as a percentage of the Fermanagh & Omagh District Council population will decrease from 21.6% in 2016 to 20.3% in 2026, those of working age will decrease from 61.4% to 60.8% whilst those of pension age will increase from 17.1% to 18.9%. These figures

are based on current pensionable age and broadly follow the trend at NI level.

Table 19 - Population Projections 2016-2030

	2016	2020	2025	2030
Fermanagh & Omagh District	115,799	117,547	119,014	119,862
NI	1,862,137	1,896,270	1,933,291	1,961,529

Source: - NISRA 2016-based population projections

- 3.7 The 2016 projected population for 2030 of 119,862 suggests that - considering population rise, an increase in working age and addressing unemployment - the Local Development Plan will need to provide for the creation of only **1,854 jobs** (see Paper 3 Employment, Industry and Business). However, based on the Census of Employment, this figure could be increased to **4,875 new jobs**.

Table 20 – Household Projections

	2012	2015	2020	2025	2030
FODC	41,966	42,709	44,129	45,699	47,046
NI	708,603	721,860	743,460	768,279	789,858

Source: - NISRA 2012-based household projections

- 3.8 The current household projections are 2012-based for the period 2012-2037 and take account of population growth, a reduced size of household and the changing age structure of the population. This could lead to an increase of 10.1% in the number of households between 2015 and 2030 i.e. an additional 4,337 households (Table 19). The average household size in N Ireland has been projected to steadily decrease to 2.46 people per household in 2030. In Fermanagh and Omagh District, the average size of households is also predicted to decline to 2.54 but will remain above the NI average.
- 3.9 The NISRA household projections are broadly in line albeit slightly lower than those set out in the Revised Housing Growth Indicators published in April 2016 (RDS 2035) which add in an element of second homes, housing stock that is vacant, and housing stock losses due to net conversion/closures or demolitions. Whilst the economic climate that has prevailed since 2007 has impacted on the demand for development land, there are indications that a slow recovery in the economy is underway. There is therefore an argument for increasing

the availability of development land to increase choice and flexibility and thus stimulate investment.

4.0 A Settlement Strategy for Accommodating Growth

Principles for Planning for Growth

- 4.1 To ensure that development is balanced and sustainable and helps to improve the quality of life for existing communities, intervention is needed. Plan making allows local people the opportunity to present their vision of how an area can be developed based on two guiding principles:
- *Sustainable Development* based on four objectives: social progress that meets the needs of everyone; effective environmental protection; prudent use of natural resources; and maintaining high and stable levels of economic growth.
 - *Equality of Opportunity* between people of different religious belief, political opinion, racial group, age, sex, marital status, physical ability, sexual orientation, and those with/without dependants. This includes promoting good relations between persons of different religious belief, political opinion and racial group (Northern Ireland Act 1998, Section 75)
- 4.2 These principles are also complemented by objectives aimed at addressing poverty (*Lifetime Opportunities - Anti-Poverty and Social Inclusion Strategy for Northern Ireland*) and ensuring the special needs of rural communities are considered (*Rural Needs Impact Assessment*).

Existing Growth Strategies - Regional Context

- 4.3 In Northern Ireland a two-tier approach to planning for growth has been adopted, comprising the Regional Development Strategy and Local Development Plan. The Regional Development Strategy 2025 (DRD 2001) introduced a framework for the future physical development of the Region based on urban hubs and clusters, key and link transport corridors and the main gateways of ports and airports. Protection and enhancement of the environment allied to the promotion of a strong spatially based economy, a healthy living environment and an inclusive society were an integral part of the drive to achieve balanced growth within the region. The Strategy has been reviewed and these themes have been built upon in the RDS 2035 (2012).
- 4.4 Spatial Framework Guidance in the RDS 2035 which is aimed at achieving sustainable development, promotes economic development opportunities and population growth in the hubs and clusters. For the rural area outside of the main and local hubs, the spatial framework

guidance is to sustain the rural communities living in smaller settlements (small towns, villages and small rural settlements) and the open countryside and to improve accessibility for rural communities. The RDS recognises that a strong network of smaller towns supported by villages helps to sustain and service the rural community.

- 4.5 The RDS identifies Enniskillen not only as a hub but also as an inter-regional gateway to the Republic of Ireland, being only 1 hours' drive to Sligo. Omagh is also identified as a hub, being a major administrative centre and situated on the Western Economic Corridor. Unlike other hubs such as Magherafelt, Cookstown and Dungannon, Enniskillen and Omagh are remote from each other so that there is little opportunity to cluster i.e. co-operation and sharing of services.
- 4.6 The RDS does not attempt to specify population growth for each Council district but instead applies housing growth indicators (HGIs) which are derived from examining 2012-based NISRA household projections, existing stock, vacancies etc. The previous total requirement in the RDS 2035 for the period 2008-2025 was set at 190,000. Fermanagh and Omagh's share of this requirement as provided by the HGIs was 12,900. The revised 2012-based HGIs which are calculated for the period 2012-2025, sets a projected new dwelling requirement for Northern Ireland of 94,000. Fermanagh and Omagh's share of this figure is 4,500. When this is projected to 2030 and adjusted to the 2015-2030 plan period, the Local Development Plan should provide for 5,190 new homes across the council area. This is more than sufficient to meet the needs of a growing number of households which is anticipated to increase by some 4,337 over the same period (Table 20). Further details of these figures together with the extent of housing land supply will be addressed in Paper 2 Housing.
- 4.7 The RDS spatial strategy is implemented at local level by development plans and HGIs for each of the 11 District Councils have been produced as a guide. Under the Planning Act (Northern Ireland) 2011, local development plans must "take account" of the RDS.

Existing Local Area Plans

- 4.8 Both the Fermanagh Area Plan 2007 and Omagh Area Plan 2002 are now well past their notional end-by dates and were prepared long before the introduction of the RDS and in very different social and economic climates. Each plan established a settlement hierarchy upon which future development or growth was based. In both plans, the main town would be the focus for most development with the smaller towns and villages identified as local centres serving the needs of their rural hinterlands. However, unlike Fermanagh, the Omagh Area Plan had small settlements or hamlets designated below village level - a fourth tier in the settlement hierarchy. These settlements could accommodate

small groups of dwellings or single dwellings as long as their size, character and identity were preserved.

- 4.9 Fermanagh has 39 villages compared to 9 in Omagh and they vary greatly in size, form and function and capacity to accommodate growth. For example, some of the larger settlements such as Ballinamallard and Belleek are urban in character, accommodating important local industries and a range of shops and services.
- 4.10 Another distinction between the two existing districts is that Fermanagh designated Dispersed Rural Communities. In all, 11 such communities were designated to promote rural regeneration and promote some scope for some additional residential development, based at focal points or in surrounding townlands (Table 21).

4.11 The proposed settlement hierarchy is shown in Table 22. This followed a review of settlements and where they sit within the settlement hierarchy which is set out in Paper 12 Strategic Evaluation of Settlements. A starting point in settlement classification is the Hierarchy of Settlements and Related Infrastructure Wheel in the RDS 2035. This outlines the patterns of service provision that are likely to be appropriate at different spatial levels including neighbourhoods, smaller towns, regional towns and cities (Table 23).

4.12 In assessing whether DRCs should be retained, analysis of the existing DRCs was undertaken including examining the extent of development around the focal point and the general consolidation of development in each DRC. Analysis of the existing DRCs in the district revealed that little consolidation had taken place in most areas. Many of the focal points were church buildings and ancillary community halls which, whilst acting as social hubs, did not act as focal points for consolidation of development as anticipated. Similarly, the dispersed nature of development meant that the areas retained their rural character and traditional settlement pattern.

Table 23: Settlement Hierarchy Classification

Source: RDS 2035 (DRD 2012)

A Proposed Settlement Strategy for Accommodating Growth

4.12 To achieve the RDS objectives of promoting population growth and economic development in the main hubs and sustaining rural communities living in small towns, villages, small rural settlements and

the open countryside, a strategy for accommodating growth can be defined based on the following settlement hierarchy:

Main Town – *The hubs of Enniskillen and Omagh act as the main service centres with Enniskillen also acting as an inter-regional gateway. It is therefore intended to focus major population and economic growth on Enniskillen and Omagh, thus maximising benefits from efficient use of existing facilities, infrastructure and their strategic location on the transport corridors. It is anticipated that the attraction of the town centres will be reinforced by retail, office and mixed use development. They will accommodate economic development through expansion and creation of industrial estates and modern enterprise and business centres. They will accommodate new residential development both within the existing urban fabric and through the expansion and creation of new neighbourhoods.*

Local/Small Towns - *These are important local service centres providing a range of goods, services, leisure and cultural facilities to meet the needs of their rural hinterland. Growth should be balanced across these towns to sustain, consolidate and revitalise them, focusing new retail and services within their town centres and providing opportunity for privately led economic investment in business and industry. These towns also can accommodate residential development in the form of housing estates, smaller groups or individual houses.*

Villages – *These important local service centres, provide goods, services and facilities to meet the daily needs of the rural area. They are good locations for rural businesses and can accommodate residential development in the form of small housing estates, housing groups and individual dwellings.*

Small settlements – *These act as a focal point for the rural community and take the form of a rural cluster or cross roads development where consolidation of the built form can provide opportunity for individual dwellings and/or small groups of houses and small rural businesses.*

The Countryside

- 4.13** Outside settlements, residential and other types of development will also be facilitated so long as it is balanced between protection of the environment from inappropriate development, while supporting and sustaining vibrant rural communities. The rural area offers opportunities in terms of the potential for growth in new sectors, the provision of rural recreation and tourism, its attractiveness as a place to invest, live and work, and its role as a reservoir of natural resources and highly valued landscapes. Therefore, it is recognised that residential and other types of development should also be facilitated so long as it is balanced between protection of the environment from inappropriate

development, while supporting and sustaining vibrant rural communities.

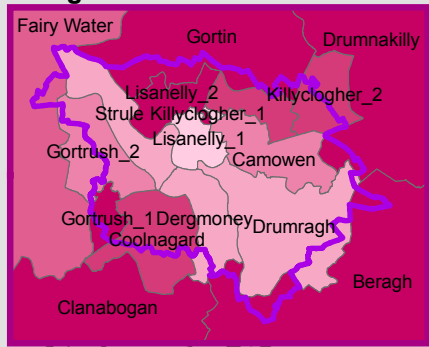

4.14 Taking into account the Strategic Planning Policy Statement (SPPS), the Council will tailor some policies to better reflect the specific circumstances of the plan area.

4.15 In defining where each settlement sits in the hierarchy, account should be taken of a wide range of factors, including the RDS spatial framework, the population of individual settlements and an assessment of the role or function of settlements. The housing paper that follows will focus in more detail on apportioning housing within the settlement hierarchy.

5.0 Conclusion

5.1 The purpose of this paper has been to provide an update to base line information on the population of the Council area to assist in informing the spatial strategy and policies of the LDP Draft Plan Strategy.
